

Facilities

Looking at things with a fresh approach has enabled us to develop a range of facilities to meet all of your requirements:

Warehousing

We operate one dedicated distribution centre, with access to further national storage, giving combined availability of 125,000 square feet c.13,000 pallet spaces. Such flexibility allows us to take large volumes of stock working on short lead times.

Reprocessing

Safety controls and labelling regulations are constantly under review. No goods will be sold from Kans and Kandy unless fully compliant with EC labelling regulations, supported by Law Laboratories Ltd, a company that has considerable expertise. Lawlabs also provide advice on product descriptions, labelling laws, product liability and related legal matters. Relabelling & repackaging are dealt with externally through specialist contractors, we will supply all old labels / artwork back to you and only we will know it is your product inside.

Distribution

In order to minimise costs and maximise controls we use specialist contractors, thus giving us the ability to collect and redistribute stock in the UK, Europe and further afield.
